

## AGMs AND FINANCIAL ANNOUNCEMENTS

Not long ago, all you needed for an effective shareholder event was an overhead projector, microphones, and a good speech. Now critical to business communication, today's AGMs and financial announcements are anything but routine.

At Mediaco, we understand the unique requirements of these events. Our specialist teams work with you to create the right technical plan, ensuring your message is meticulously communicated.

### *staging and technical design and coordination >*

Your meeting may involve several event technologies, depending on your objectives and budget.

Staging is Mediaco's premier service category, specializing in innovative solutions for complex AGMs. To take on large or just very demanding productions we offer the knowledge, experience and equipment required for assured success.

We promise mission-critical performance – no excuses.

### **AUDIOVISUAL AND RECORDING**

Mediaco offers comprehensive audiovisual, recording and technical services. Our specialist teams bring decades of combined AGM experience. Services are available individually – video production or sound design, for example – or as part of a complete solution.

### **ADVANCED EQUIPMENT RENTALS**

A vast, rigorously up-to-date inventory of audio, video, lighting, staging and related equipment is available for rent through any Mediaco location.

### **WEBCASTING**

Webcasting enables you to vastly extend the reach of your event's messages, and assures full disclosure of results. Mediaco produced Canada's first webcast in 1995. Since then, chartered banks, major corporations and other clients have relied on Mediaco for innovative audio and video webcasting services.

### **DATA DISPLAY AND PROJECTION**

Mediaco's display and projection systems ensure a superb audience experience. Large-format projection solutions include advanced PowerPoint graphics creations and presentation management. Multi-image panoramas blend individual images into a spectacular, continuous projected image. High-resolution matrix switching enables the mixing of images, such as PowerPoint, with other sources like video cameras.

### **TRANSLATION: SIMULTANEOUS INTERPRETATION SYSTEMS**

Mediaco provides state-of-the-art translation systems and assured support for translators.

For complete confidentiality, Mediaco uses the latest digital infrared systems and equipment. This approach guarantees that your proceedings stay strictly within the meeting room walls.
