

CONFERENCES

Destination, venue, theme, speakers, and countless crucial details, conferences are often years in the planning. When event day finally arrives, your best ally is a technical services provider you know you can count on.

Mediaco's Conference and Meeting solutions enable you to present, persuade and communicate brilliantly. Our specialists know how to create the bullet-proof technical plan you need to deliver your long-awaited event.

staging and technical design and coordination >

Your meeting may involve several event technologies, depending on your objectives and budget.

Staging is Mediaco's premier service category, specializing in innovative solutions for complex events. To take on large or just very demanding productions, we offer the knowledge, experience and equipment required for assured success.

We promise mission-critical performance – no excuses.

AUDIOVISUAL AND RECORDING

Mediaco offers comprehensive audiovisual, recording and technical services. Our specialist teams bring decades of combined event experience. Services are available individually – video production or sound design, for example, or, as part of a complete solution.

ADVANCED EQUIPMENT RENTALS

A vast, rigorously up-to-date inventory of audio, video, lighting, staging and related equipment is available for rent through any Mediaco location.

WEBCASTING

Webcasting enables you to vastly extend the reach of your event's messages. For pennies per person, include an online audience in some or all of your proceedings. Mediaco produced Canada's first webcast in 1995. Since then, chartered banks, major corporations and other clients have relied on Mediaco for innovative audio and video webcasting services.

DATA DISPLAY AND PROJECTION

Mediaco's display and projection systems ensure a superb audience experience. Large-format projection and display solutions include advanced PowerPoint graphics creation and presentation management. Multi-image panoramas blend individual images into a spectacular, continuous projected image. High-resolution matrix switching enables the mixing of images, such as PowerPoint, with other sources like video cameras.

TRANSLATION: SIMULTANEOUS INTERPRETATION SYSTEMS

Mediaco provides state-of-the-art translation systems and assured support for translators.

For complete confidentiality, Mediaco uses the latest digital infrared systems and equipment. This approach guarantees that your proceedings stay strictly within the meeting room walls.
